

Fishing spear for cable PSh

The Fishing Spear for cable PSh is used to grip and retrieve electrical cable, slick line and logging cable with gripping outside and pressing inside body during fishing operations in wellbore.

Fig. 1

The Fishing Spear has a robust construction, which allows conducting operations of cable retrieving. Hooks are placed inside body and have different sizes increasing from bottom to top in order to grip collar from cable. Part of cable is pressed inside spear body.

Increased number of hooks allows carrying heavy load during collar retrieving. The upper sub has a port for technological flushing.

Code	PSh-114
Outside diameter, in	4.49
Inside diameter, in	3.58
Flushing port diameter, in	1.38
Length, ft	5.64
Connecting thread	2 $\frac{7}{8}$ Reg
Weight, lb	103.64
Number of fishing hooks	24
